Snowflake packing

Snowflake is usually made from polyethylene plastic ring (PE), polypropylene (PP), reinforced polypropylene (RPP), polyvinyl chloride (PVC), chlorinated polyvinyl chloride (CPVC) and Polyvinylidene Fluoride (PVDF) etc.

Snowflake packing has the following advantages:

- 1) light weight;
- 2) good toughness,
- 3) impact resistance,
- 4) non-friable,
- 5) large flux
- 6) lower pressure drop

Snowflake is widely used in absorption, desorption, extraction, dust and other devices. Also Widely used in petroleum, chemical, chlor-alkali, gas and environmental protection industries in the packed tower.

Technical data sheet of Snowflake (based on material: Polypropylene)

Name	Size (mm)	OD×H×T (mm)	Surface Area (m ² /m ³)	Volidity (m ³ /m ³)	Bulk number (n/m ³)	Bulk weight (kg/m ³)
Snowflake packing	Φ95	95×34×1.5	138	0.97	4900	49
